

Mity-Lite® tables come in over 50 sizes and are engineered for many years of reliable service! Here are just a few standard features we include to ensure your confidence in our tables:

Patented Sub-surface

Unique sub-surface provides moderate heat shielding and keeps table surface smooth and flat.

Heavy Duty ABS Edge

Internal ABS edge support reinforces top and bottom ABS shells, for a tough impact resistant edge.

High Impact ABS Surface

Tabletop is thermoformed from high-impact ABS plastic in a variety of textures and colors.

Hardwood Strength & Stability

Inner hardwood leg supports consist of alder for superior strength and performance.

Permanently Bonded

Top and bottom ABS shells are permanently bonded to sub-surface and strong inner hardwood supports.

Strong Leg Attachments

16 gauge steel leg brackets are bolted metal-to-metal into steel T-nut fasteners. Each anti-spin fastener is embedded into the internal hardwood frame.

Supports Heavy Loads

Unique combination of engineered supports and LVL wood runners help sustain an evenly distributed load of 1600 + pounds, yet a 30"x72" Mity-Lite table weighs only 41 pounds!

Welded Trim

Trim is chemically welded to the entire perimeter of the table, fusing top and bottom plastic shells and sealing out moisture.

Impact-resistant Corners

Injection molded ABS corners are designed for shock absorption—withstanding a 2-foot corner drop with no structural damage!

Safe Non-Slip Stacking

Replaceable rubber anti-skid pads keep tables from sliding when stacked.
